About This Manual

SVF Cloud for Salesforce is a cloud service that allows you to output forms using Salesforce object data. You will be able to output forms once you install the SVF Cloud for Salesforce package in Salesforce and configure it for Salesforce objects.

This manual describes procedures for using SVF Cloud for Salesforce, from installation to initial setup, and also uninstallation.

Notational and Typographic Conventions

This section explains the notational conventions used in this manual.

Notes, Hints, and Restrictions

This manual distinguishes between notes, hints, and restrictions as follows.

📤 Note

Notes provide information about actions that are difficult or impossible to undo.

🥟 Hint

Hints provide supplementary information on using the product.

Restriction

Restrictions provide information on product restrictions.

I Typographic Conventions

The following typographic conventions are used in this manual.

Typographic Convention	Example	Description
Bold	Select Print from the File menu.	Indicates item names and menu names displayed on the product screen. Item names for the OS and for third-party products are displayed in the same way.
<>	http:// <server_name_or_ip_address></server_name_or_ip_address>	Indicates a string which depends on the environment, such as a URL or part of a file name. Command arguments are also indicated using these symbols.
0	Select [Total sales] from the Search Conditions list.	Indicates item names, menu names, and other information displayed on the product screen that have been created and set by users.

Trademarks

Company and product names that are referenced in this manual are trademarks or registered trademarks of the respective owners.

Copyright

Chapter 1. Installation

Access the installation URL provided on the delivery slip and start installing the SVF Cloud for Salesforce package. The package must be installed individually for each organization that will be using SVF Cloud for Salesforce.

If you upgrade an installed package, the existing package will be overwritten.

Use the following procedure to install SVF Cloud for Salesforce:

1.

Access the installation URL provided on the delivery slip. The Salesforce login screen appears.

2.

Log in using the account of the organization where you want to install SVF Cloud for Salesforce. The **Install SVF Cloud for Salesforce** page appears. If you are upgrading an installed package, the **Upgrade SVF Cloud for Salesforce** page appears.

3.

Select **Install for All Users** and click the **Install** button. If you are upgrading an installed package, click the **Upgrade** button.

Install for	Admins Only	Install for All Users	Install for Specific Profiles
			Install Cancel
App Name	Publisher	Version Name	Version Number
SVF Cloud for Salesfor	rce	production, property	 10
SVF Cloud for Salesfor	rce View Components	production, by part for	

The installation starts.

When the installation is completed successfully, the Salesforce user who installed the package will receive a notification email.

You can now select SVF Cloud for Salesforce from Force.com App Menu at the top right of the screen.

🥟 Hint

Changing the display names for applications

You can change the names displayed on **Force.com App Menu** by completing the following procedure. If you install Ver. 2.xx of SVF Cloud for Salesforce for the same organization that is using Ver. 1.xx, we recommend that you change the display names. Otherwise, **SVF Cloud for Salesforce** will appear twice on **Force.com App Menu**.

- 1. Select App Setup Create Apps from the Setup menu in Salesforce.
- 2. Click **Edit** for the row that contains the application name to be changed.
- 3. Change App Label to a new name.
- 4. Click the **Save** button.

Chapter 2. Initial Setup After Installation

After installation, set up SVF Cloud for Salesforce to allow users to configure and output forms. Initial setup is not required if you have upgraded an installed package.

1.

Select Administration Setup - Manage Apps - Connected Apps from the Setup menu in Salesforce.

The **Connected Apps** page appears.

2.

Confirm that the following applications are displayed.

Application	Description
SVF Cloud Design Application	Application for the Form Settings tab.
SVF Cloud Guide Application	Application for the Getting Started tab.
SVF Cloud Preview Application	Application for outputting forms.
SVF Cloud Printer Application	Application for the Printer Settings tab.
SVF Cloud Usage Application	Application for the Activities tab.

🥟 Hint

This section provides an example of how to configure SVF Cloud Design Application.

3.

Click SVF Cloud Design Application under Master Label.

SVF Cloud Design		

Attaching files

Permit basic access to target objects in Profile on the Settings menu in Salesforce.

Standard Object Permissions

The permissions defined here control access at the object level. Access to individual records within that object type is controlled by the sharing model. Set access levels based on the functional requirements for the profile. For example, create different groups of permissions for individual contributors, managers, and administrators. How do I choose?

Chapter 3. Uninstallation

Uninstall the SVF Cloud for Salesforce package.

You must delete any print buttons that you created in SVF Cloud for Salesforce before you uninstall the package.

- <u>3-1 Preparing to Uninstall</u> (page 13)
- <u>3-2 Uninstalling the Package</u> (page 19)

3-1 Preparing to Uninstall

You must delete any print buttons that you created in SVF Cloud for Salesforce before you uninstall the package. Multiple components are associated with user-created print buttons. Therefore, you must delete all of the components associated with the print buttons from all of the Salesforce objects where the buttons were created.

To delete these components, you must delete the items listed in the following table. Delete these items in order, starting from 1. If you do not follow the specified order, you may not be able to delete the components. \bigcirc indicates an item that you must always delete, while \triangle indicates an item that you must delete if it exists.

Items to delete and deletion order

Order	Items to delete	Required?
1	Print Button Placed on an Advanced Settings Page (page 13)	\bigtriangleup
2	Print Button Placed in the Related List on an Advanced Settings Page (page 14)	\bigtriangleup
3	Print Button Placed in Search Layout (page 16)	
4	Print Button Created on the Form Settings Tab (page 17)	0
5	Visualforce Page for the Print Button (page 18)	0

Use the following procedure to delete the print buttons.

🥟 Hint

This section provides an example with a print button named [SVF Print] created in the Account object in Salesforce.

1. Deleting a Print Button Placed on an Advanced Settings Page

- 1. Click **App Setup Customize Accounts Page Layouts** from the **Setup** menu in Salesforce. The **Account Page Layout** page appears.
- 2. Click Edit for the row where "Account Layout" appears under the Page Layout Name heading.

3. Deleting a Print Button Placed in a Search Layout

🥟 Hint

The procedure for deleting a print button placed in a search layout is the same in both **Search result** and **Account list view**.

This section provides an example of how to delete a print button placed in **Search result**.

1. Select **App Setup** - **Customize** - **Accounts** - **Search Layouts** from the **Setup** menu in Salesforce. The **Account Search Layouts** page appears.

2. Click **Edit** for the row where "Search Results" appears under the **Layout** heading.
